Notes:

- ¹ This is based on NW part (0.85 ha) coming in at 1/2 rate. This northwest part will continue to be joined to Ficzero Drain but with a cross-connection to the PDS22.
- ² This is based on easterly 0.48 ha coming in at 1/2 rate.
- ³ This is based on easterly 0.76 ha coming in at 1/2 rate.
- ⁴ This is based on one westerly area (6.07 - 4.24 =) 1.83 ha coming in at 1/2 rate. Use (4.24 + 0.92 =) 5.16 and since it is farm, reduce result by half, and reduce by one half once more since depressional. and on one other westerly 0.42 ha coming in at 1/2 rate. Use (2.6 + 0.21) / 2 since it is farm and reduce by one half once more since depressional. The combined net will be 1.99 ha.
- ⁵ This is based on 4.00 - 2.79 = 1.21 at 1/2 rate = 0.60 and 2.79 + 0.60 = 3.49. Use 1/2 (1.74) for farm and one more 1/2 for lower end to give 0.87. There may be 0.37 ha severance but such is not provided for here yet.
- ⁶ This is based on 12.87 - 4.18 = 8.69 at 1/2 rate = 4.35 and 4.18 + 4.35 = 8.53. Use 1/2 (4.26) for farm and one more half for lower end to give 2.13.
- ⁷ Arbitrarily given split roll numbers while waiting for severance data to be received.
- ⁸ There are two separate residential lots with the same roll number but with different PIN numbers in the assessment roll. For purposes of this schedule, the roll numbers are differentiated as shown.
- ⁹ This roll number is our best guess of the consolidation of all the former individual parcels of Spencer and Vera Howes.
- ¹⁰ This is based on reducing by 1/2 since farm and another 1/2 since at lower end.
- ¹¹ This assessment is for cut-off benefit.
- ¹² Where the only service provided is a PDC, the affected area was set at 0.1 ha which is equivalent to a small house size.
- ¹³ Section 21 of the Drainage Act, RSO 1990 requires that assessments be shown opposite each parcel of land and road affected. The affected parcels of land have been identified using the roll number from the last revised assessment roll for the Township. For convenience the owner's names as shown by the last revised assessment roll have also been included.
- ¹⁴ **All assessments to "lands" are to be "non-proratable". All assessments to roads are to be proratable, based on actual costs and after land assessments are deducted.**
- ¹⁵ An assessment to any land parcel will be made in the year in which the costs are incurred.
- ¹⁶ Each land parcel in the above schedule will be assessed in the year when a PDC is provided to the parcel or when, for the larger land parcels, the construction serving the parcel is deemed sufficiently complete to serve the parcel.
- ¹⁷ As is evident, existing rural parcels are assessed "outlet" on the basis of being rural. If these lands develop, an "outlet" increase will have to be part of reassessments for maintenance.
- ¹⁸ These two parcels were missed in data provided for April 2022 Public Meeting.
- ¹⁹ The \$500 Special Benefit assessment is for a backwater valve. If such BWV is not necessary, the special benefit will be removed.
